SUMMARY

Security-focused IT and cybersecurity professional with CompTIA Security+ and Network+ certifications and hands-on experience across SOC operations, incident response, malware analysis, and systems defense. Experienced in alert triage, endpoint hardening, and security documentation using structured Markdown workflows (Obsidian). Actively expanding cloud, automation, and AI-driven defense skills through Microsoft Azure coursework, Red Siege training, and CompTIA AI/CyberDefense Pro programs. Known for strong diagnostic instincts, rapid skill acquisition, and clear technical communication.

CORE TECHNICAL SKILLS

Security Operations & Incident Response: Alert triage, IOC analysis, malware analysis (static/dynamic), incident documentation, MITRE ATT&CK; mapping

Endpoint, Identity & Network Security: Endpoint hardening, RBAC/AAA, least privilege, vulnerability assessment, network segmentation

Cloud, Automation & AI: Azure fundamentals, Microsoft Foundry, AI-assisted security workflows, automation logic, prompt engineering

Systems & Networking: Windows Server, Windows 11, Ubuntu/Debian Linux, Cisco IOS, VLANs, ACLs, VPNs

Tools & Platforms: Splunk, Wireshark, nmap/Zenmap, Nessus, CyberChef, Autopsy, Packet Tracer, HTB, LetsDefend

Frameworks & Protocols: NIST CSF, MITRE ATT&CK; DNS, DHCP, SSH, VPN, AAA, RBAC

TECHNICAL PROJECTS & HANDS-ON EXPERIENCE

Technical Portfolio & Systems Documentation (Quiet Site)

Independent Project | 2024-Present

- Designed and maintain a published technical portfolio documenting real-world systems builds, hardware rebuilds, network architecture, endpoint hardening, and security projects
- Structured documentation using Markdown-based workflows to ensure clarity, traceability, and long-term maintainability
- Integrated hands-on work across systems, networking, security defense, and cloud foundations into a single navigable technical record

Security Operations & Incident Response

LetsDefend, Hack The Box, CIAT Labs

- Conducted SOC investigations including malware triage, alert analysis, and false-positive validation
- Correlated host and network telemetry to identify suspicious activity and attack patterns
- Documented IOCs, timelines, and remediation steps using structured Markdown workflows

Threat Intelligence & Vulnerability Analysis

- Analyzed CVEs, mapped vulnerabilities to exploits, and performed service enumeration using nmap
- Investigated phishing campaigns and researched APT techniques using OSINT

Security Automation & Detection Engineering

- Built and tuned detection logic for phishing, suspicious PowerShell execution, malware payloads, and data exfiltration
- Applied automation concepts to reduce analyst workload and improve triage efficiency

Additional Experience: Endpoint & Event Security Hardening, Identity & Access Management (IAM), Cloud & AI Foundations (Azure), Offensive Security Foundations (Red Siege - In Progress)

PROFESSIONAL EXPERIENCE

Freelance IT Support & Technical Consulting

2005-Present

Delivered IT and security support including device troubleshooting, secure configurations, and access controls. Implemented backups, identity management, and hardened environments for small organizations.

Head of IT / System Administration - Invasion Group & Righteous Babe Records

2022-2024

Managed secure IT infrastructure, endpoint protection, and cloud access workflows. Applied hardening practices and access controls to reduce operational and cybersecurity risk.

Owner / Systems & Operations Manager - Sidewalk Sages

2016-2021

Managed POS systems, scheduling platforms, and internal technology operations. Improved system reliability and operational security.

Specialty Department Manager - Earth Fare

2021-2022

Provided Tier-2 troubleshooting for POS and operational software systems.

Online Booking Department Manager - Starving Students

Feb 2009-Jan 2011 | Los Angeles, CA

Led the transition from a phone-only booking model to the company's first hybrid digital system. Managed a five-person team handling online leads and established process standards.

Co-Founder - Crumpled Thoughts (501(c)(3))

2021-Present

Designed and managed secure networking and cloud platforms for nonprofit operations. Developed technology and cybersecurity literacy initiatives aligned with NIST and SOC-style frameworks.

EDUCATION & CERTIFICATIONS

California Institute of Applied Technology (CIAT)

Certificate in Computer Information Systems (CCIS) - 4.0 GPA

Associate of Applied Science (CIS) - Expected June 2026

CompTIA Certifications

Security+ (Active through 2028) | Network+ (Active through 2028) | A+ (Earned 2026)

• Includes CompTIA Stackable Certifications: CIOS, CSIS, CAPP

Additional Training (In Progress)

Microsoft Azure AI Engineer Learning Path | CompTIA AI Interaction Essentials | CompTIA CyberDefense Pro v2
